WHAT'S IN THIS PACKAGE

- **Mac** — `ezdown-*--mac.dmg`
- **Windows** — `ezdown-*--win.exe`
- **Linux** — `ezdown-*--linux.deb`
- This `README.pdf`

INSTALL — MAC

1. Open the DMG.
2. Drag **ezdown** into **Applications**.
3. If macOS says the app is “damaged”, double-click **Fix Gatekeeper** on the DMG (or see below).

If you see “ezdown.app is damaged and can’t be opened”: that is macOS blocking an unsigned download — the app is not actually corrupted.

Open Terminal and run:

```
xattr -cr /Applications/ezdown.app
```

Then open ezdown from Applications.

INSTALL — WINDOWS

Run the `.exe` installer and follow the prompts.

INSTALL — LINUX

```
sudo dpkg -i ezdown-*--linux.deb
```
